

Intelligent Macro Space Management

SmartSpace is an intelligent Macro Space Management & Planning Solution that provides the tools for retailers to streamline and automate time consuming, resource heavy retail floor planning and management requirements.

We enable you to maximise the return on your spatial investment through efficient and accurate planning based upon real-time data and up to the minute analysis of your store space and merchandise placement.

RGIS has more than 50 years of experience in the retail industry delivering products to leading global retailers. We have formal partnerships with world class consultancy and complimentary system providers enabling us to offer 360 ° solutions.

Seamless integration with existing CAD Departments within retail customers

StorPlanner CAD

Used by
Merchandising
Space Planning
Estates Dept.
Marketing
Construction

RM3 DataCollector

- Import Store CAD
- Intuitive visual tools

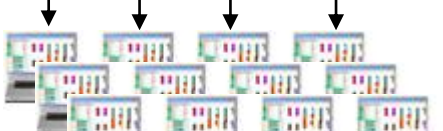

SmartSpace Retail Database (SQL)

Multi format output

Used By RGIS Store Surveyors
Fast and accurate means of collecting spatial information at store level with seamless integration to other SmartSpace applications

SmartSpace Express

Used by
Managers at HQ
Regional Managers
District Managers
Basic editing, mobile viewing & Markup capabilities

Heat Mapping

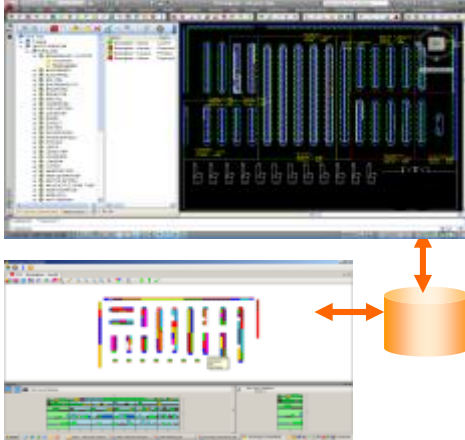

Reporting & Analysis

Process Automation

What is SmartSpace?

- A best of breed floor planning macro space management solution
- Data collection technology that produces highly accurate store specific floor plans and survey information
- Query enabled database to examine KPI's, adjacencies, shrink
- Heat mapping capability to quickly visualize performance by store
- Fully integrated with AutoCAD

Results That Pay

- Significant time savings for space planners
- Automation of routine tasks
- Ability to visualize new layouts quickly
- Business analytics to support profitable decision making
- Compare effectiveness of different layouts quickly
- Map sales, sales/sq. ft., shrink and other metrics in easy to see format

SmartSpace by RGIS Key Benefits

Space Profitability Insight Increase return on space by identifying poorly performing areas within stores. Compare merchandise layouts to top performing stores with similar demographics and automatically replicate optimum layouts

Nielsen IQ, Relex & Blue Yonder SmartSpace connects directly to 3rd party databases for seamless integration.

Visualisation SmartSpace can utilise fixtures and associated planograms within CAD drawings to build actual or theoretic store layouts.

Heat Mapping –SmartSpace can exploit powerful hot spotting functionality relating to space driven KPI's such as sales, margin, profit etc.

Workforce productivity Dramatically increase productivity within Space Planning and Merchandise Departments by eliminating repetitive tasks and providing the tools for process automation

Reporting SmartSpace has a sophisticated reporting engine that comes with a number of standard spatial reports for export in multiple formats. We can also develop customer specific reports or train individuals within the organisation to create them

Compatibility SmartSpace applications are compatible with multiple CAD, Micro and Macro space planning systems.

Security SmartSpace has a sophisticated User Access and Workflow managements System. This can be used to control and monitor all aspects of the solution

Together, We Build The Partnership
